#### Dear Reader:

The year 2008 was yet another monumental year for the State of New Jersey in reducing the number of fatal motor vehicle crashes. During 2008, New Jersey recorded over an 18% decrease in fatal crashes, with a total of 555 fatal collisions resulting in 590 fatalities. It is through the dedication of the New Jersey State Police, local and county police departments and various nonprofit organizations, that we as a state continue to be leaders within the nation in keeping our highways safe and reducing the number of fatalities on our roadways.

Our efforts in reducing the number of motor vehicle deaths through education, enforcement and roadway engineering must continue, as highway fatalities are still one of the leading causes of death in New Jersey and the nation. The nationwide death toll for 2008 was 37,261, representing a national average of 102 deaths per day.

On the following pages you will find statistics of the fatal motor vehicle crash records compiled by the Fatal Accident Investigation Unit of the Division of State Police for 2008. This report constitutes a detailed look at the causes and results of fatal collisions throughout the state during 2008. Hopefully, the continued effort and cooperation of the public, federal, state, and local agencies will help us maintain our traffic safety records in the years ahead.

Sincerely,

Joseph R. Fuentes

Colonel

Superintendent
